July 19, 2020

Under Ohio Consumer Laws you can now bring lawsuit
against any retail establishment selling or manufacturing
Face Masks or Facial Coverings for the purpose virus protection

You can now file lawsuits against anyone selling a facial covering
that has not been Medically Approved to filter contagious diseases
This includes any Homemade or Factory made mask

With the rise in lung damage caused by pleurisy you can
Legally sue for Medical Damages and or selling a Medical
Device without license

Any mask sold without proper warning labeling sewn into the
fabric will be considered in violation, you can also file a mis-
labeled or not FDA approved lawsuit

You can also pursue anyone selling face masks out of their home
You can also bring suit if selling a medical device without license
You can also bring suit for Illegal Monetary Sales and failure
to disclose income under IRS 254-70994US
You can also now bring suit against any small business that
knowingly sells a defective face covering that causes lung damage

We believe these lawsuits will be very lucrative moving forward
