

Approaching The Masked Stranger

We all know to approach people who aren't wearing a mask and hand them a MAFA card or flyer. But what about the people wearing masks? Should we approach them?

The answer is "perhaps." Some people are visibly frightened of others and want to avoid eye contact. Stay away from them. Also stay away from anyone who throws a hateful look your way because you are not wearing a mask.

But do look for people who are fiddling with their masks or wearing them under the nose instead of covering their faces "properly." Some of these may be customers in stores, but we are finding that they are often employees who have to wear masks all day long and do not like it. ***These are the people to talk to!***

Here's a sample dialog:

"That mask looks uncomfortable."

They often will say, "It is."

To which you can respond, "I'm with a group that is working on ending this and other silly mandates. Here's some info. (hand them a card). They don't want your money; they just ask that you register so they can represent you. I'm a member and they get things done!"

That's it! Another way to grow our group!!
