

Make Americans Free Again, Ohio Stands Up!, the New Mexico Freedoms Alliance, and New Mexico Stands Up Partner to Fight Tyranny

“The State and Federal public health system have misled the public, politicians, and even the Courts. If they have ANY integrity, they will recognize the truth and accept our requests for injunctive relief.”

12/21/2020, New Mexico and Ohio – It is a true honor and privilege to announce that Make Americans Free Again, Ohio Stands Up!, New Mexico Stands Up! and the New Mexico Freedom Alliance are partnering in the fight against tyranny. Today the legal team representing the Ohio Stands Up! lawsuit against the State of Ohio, along with Attorneys N. Ana Garner and Jonathan Diener from New Mexico will be filing a major action in the state of New Mexico to free New Mexicans from the tyrannical overreaction to a disease that has been shown to have a 99.9%+ recovery rate.

This exciting news is made better by an announcement from the same team that they will be filing a third action against the HHS, CDC, and NCHS for intentionally misleading the public regarding the dangers of COVID-19.

Attorney Renz stated, “This is a major step in freeing our nation. The data and facts could not be more clear. Neither could the fact that DHHS has allowed its staff to egregiously violate the law by misrepresenting the dangers posed by this virus. We look forward to shining the light of truth on this issue and alleviating the fears of the public.”

Attorney Garner stated, “Today we take the first step in throwing off the shackles of tyranny and truly re-opening New Mexico and the nation.”

The three organizations agree that if this sort of reaction from the government for a disease that has been shown to be roughly as dangerous as the seasonal flu, is considered justifiable under the law, then our freedoms as Americans are truly lost.
