

Updates for Week of September 27

MAFA's lead attorney, Tom Renz, delivered a riveting presentation at Clay Clark's event last weekend that everyone should watch. During this short lecture, Tom discloses the information recently received from a government whistleblower who has access to the CMS database for Medicare. The information from this person covers outcomes from both COVID treatments and vaccines and should shock all of us!

Here is a link to Tom's website:

Just scroll down and you will see the video. This is a little longer than the usual videos we show at meetings, but the information is so important that we think it justifies the extra time to watch it.
