

Make Americans Free Again! Citizens in Charge!

We have a simple platform that is not related to politics, political parties, or candidates:

We want freedom from medical tyranny and to make sure that this never happens again.

We are gathering 80 million people who meet in groups of 2 to 100 - live and in person - in communities throughout the U.S. We are raising enormous amounts of money to fund lawsuits that address the real cause of today's insanity – the false declaration of a pandemic. We intend to restore our freedoms and punish those who are responsible for this debacle.

While our lawsuits are proceeding through the courts, we are engaged in productive activities that improve our lives such as:

- saving local businesses devastated by lockdowns and restrictions
- helping parents to withdraw their children from schools that perpetuate COVID nonsense and assist them with home schooling
- organizing healthcare workers to oppose vaccine mandates and also dismantling the broken regulatory system that currently results in censorship, practice restrictions, and loss of income

Ours is a disciplined and measured approach to solving this problem.

The enemy we face is diabolically smart, has unlimited resources, and has been planning this madness for at least a decade. We are not going to win against such an enemy unless we are strategic and use our limited resources wisely.
