## **For Immediate Release**

On February 18 2022, attorney Richard Chambers Jr. filed a lawsuit against the city of Boston, Mayor Michell Wu, The Executive Director of Boston Public Health, and the Boston Public Health Commission. The lawsuit was funded by Make Americans Free Again. The suit concerned the unlawful orders issued in December 2021 requiring vaccine passports for admission to “indoor entertainment, recreation, dining, and fitness settings” in the city of Boston.

The lawsuit asked the court for “immediate, preliminary and injunctive relief” from these unlawful orders, and requested a jury trial to determine monetary damages.

Chambers had previously sent a letter to Wu asking her to work within the law, and when she did not respond, he filed the action in federal court.

***Just 5 hours later Wu caved,  
and lifted the proof of vaccination requirement.***

Congratulations to Richard Chambers and the Make Americans Free Again Massachusetts group for helping Mayor Wu to understand that illegal actions have both political and personal consequences. When faced with the potential for personal financial responsibility for the damages her orders would cause to local businesses, she quickly changed course.

***We Are Not Yet Finished With Mayor Wu and  
the Boston Public Health Commission!***

Our lawsuit asks the court to find that the statutes which were relied upon to issue the orders are unconstitutional and invalid because they are broad and ambiguous; and also to declare that the creation and existence of the Board of Boston Public Health Commission is unconstitutional because it was not created by Boston City Council.

***In other words, we are asking the court to ensure  
that this illegal activity can never take place again!***
