

Why Join Make Americans Free Again (MAFA)?

Because you'll make new friends – people who share your views and values

Because you'll have fun! Most people report that MAFA meetings are the highlight of each week!

Because you'll work with fellow group members to invest in your community – for example, our small business rescue program has saved thousands of businesses that were damaged by restrictions and onerous rules.

Because you'll attend fun parties and gatherings that **raise money for our legal team**

Because MAFA groups are the place to find almost anything you need:

a new church, school, or other organization that is not “woke”

a new job

new clients for your business

a new doctor or nurse practitioner who does not promote or require shots for your kids

home school parents to collaborate with

restaurants, bars, shops and other places that do not require masks or vaccine passports and temperature checks and other nonsense (if your area is impacted by these issues)

A couple who met at MAFA is getting married soon – if you are single, you may even find your soulmate!!

MAFA groups provide the ultimate networking opportunity for everyone!

Because you'll be joining the most successful group in the U.S. that is restoring our communities and our country.

And because we are bringing tens of millions of people together:

tens of millions of people can stop almost any rule or restriction the government imposes by just refusing to comply

tens of millions of people can end a chain store's policy quickly (like not accepting cash) by refusing to shop there until the policy is changed

tens of millions of people can orchestrate the end of masks on planes by refusing to fly until the rule is ended

tens of millions of people can be sorted by location and insist that local public officials do what we want them to – because we have enough people and the power to vote them out!

And last but not least because we are Americans who love our country & want to save it!

Americans are soon going to face many challenges that may be worse than the medical tyranny we have already endured for over two years. These may include changes in the banking system, a complete government takeover of the healthcare system, and food shortages. Joining with us to continue building our “parallel society” can ensure that we can survive and thrive in spite of these events. Tens of millions of people working together can form their own financial system, their own healthcare networks, and arrange for their own food supplies.

Join today. Build a better future with us.
